EDUCATION

Robert Morris University

Pittsburgh, Pennsylvania

B.S. in Computer Science

May 2026

- **Concentration:** Software Engineering
- **GPA:** 3.68/4.00, *Dean's List*
- **Related Coursework:** Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Object-Oriented Programming, Value Design, Fundamentals of Software Engineering
- **Certification:** Supervised Machine Learning: Regression and Classification – DeepLearning.AI, Stanford University

EXPERIENCE

Business Robots AI

Pittsburgh, Pennsylvania

Software Engineer / AI Engineer

Jan 2025 – Present

- Built and scaled the core automation platform used by 20+ businesses, developing backend workflows, API integrations, and production services for customer engagement and lead handling.
- Designed and implemented integrations connecting messaging platforms, external APIs, business systems, and internal services to support automated workflows.
- Contributed to platform engineering and production deployment as the startup expanded its customer base and raised \$100K in funding.

Cricket Wireless

New York, New York

AI Engineer Intern

Jan 2024 – May 2024

- Developed Python-based internal tools and data-processing workflows to automate analysis and support business operations.
- Built and evaluated 5 machine-learning models, improving predictive performance by 20%.
- Processed and analyzed 1,000+ customer and sales transactions to identify anomalies, trends, and operational insights.

Ursus Medical

Pittsburgh, Pennsylvania

Medical Image Analysis Intern

May 2025 - Aug 2025

- Developed a 3D medical-image processing pipeline using Python, SimpleITK, MATLAB, and ITK-SNAP to process ultrasound volumes and isolate optic nerve structures.
- Implemented and compared thresholding, classification, smoothing, and active-contour segmentation algorithms for medical-image analysis.

PROJECTS

Flashcard AI

Pittsburgh, Pennsylvania

Full-Stack Developer | Next.js, Stripe, Clerk, OpenAI API

Jun 2024 – Sep 2024

- Built and deployed a full-stack web application using Next.js that transforms user-provided topics into structured AI-generated flashcards.
- Developed REST/API integrations for content generation, authentication, payments, and persistent user data.
- Integrated Clerk authentication and Stripe payments to support secure free and paid user workflows.

CattleCraft Farm Management App — Full-Stack Mobile Developer Pennsylvania

Pittsburgh,

Full-Stack Developer | React Native, Expo

Jan 2026 – March 2026

- Built and shipped a cross-platform farm management application using React Native and Expo, with authentication and database-driven CRUD workflows.
- Developed mobile-first features for livestock records, health tracking, expenses, and daily farm operations and published the application to the iOS App Store.

SKILLS

Languages: Python, JavaScript/TypeScript, Java, SQL, C++

Frameworks & Development: React, React Native, Next.js, Expo, FastAPI, Django, REST APIs

Databases & Cloud: PostgreSQL, Firestore, Supabase, AWS

Tools: Docker, Git, GitHub, Linux, Jupyter

AI & Data: Pandas, NumPy, scikit-learn, Machine Learning, OpenAI API
